

## Ideation Phase

### Define the Problem Statements

Date	19 September 2022
Team ID	PNT2022TMID20247
Project Name	Project - IOT Based Safety Gadget for Child Safety Monitoring&Notification
Maximum Marks	2 Marks

### Problem Statements:

Whom does the problem affect?	What would be the issue?	What would be the Impact of the Issue?	What would happen when it is fixed?	Why is it important that we fix the problem?
<p><b>CHILDREN</b></p> <p>As Most of the kids have been abducted by strangers, which is a more frequent event nowadays. Child abduction continues to be a major issue and it has an utmost impact on the affected families.</p>	<p>Child abductors often kidnap children from legally appointed guardians to get the ransom and for their personal benefit. The out-turn of abduction can be seriously pessimistic and enduring more actions must be taken to protect children against abduction and its effects.</p>	<p>Child abduction is a scorching subject all over the world. It is a complex crime that can impair a child's future. Parents should ensure that their little ones are secure and are been protected from the menace of injury</p>	<p>The application aside from conceding you to track down your children when they're within Bluetooth range, it also functions when your kids go farther afield.</p> <p>Its competence as a tracker is outstanding and if you live in densely populated areas like cities or big towns. This means you will be able to see the identity of the participating devices and it helps to diminish their vulnerability in harmful situations and also protects the children in emergency situations.</p>	<p>Parents take measures both at home and outdoors to safeguard their kids from hurting themselves. But sometimes, it's impossible to pre-empt what can cause a treacherous encounter. However, it's possible to prevent such hazards with some forethought and simple measures.</p>
